SpeedStream® 1022
Wireless USB Adapter

Quick-Start Guide

Before you begin:

Verify that the following items came with your SpeedStream® 1022 Wireless USB Adapter:

Wireless USB Adapter

USB Cable

CD-ROM containing Documentation and Drivers

Safety and Certifications Information

Quick Start Guide

Before installing the hardware or software,ensure that your computer is equipped with the following:

- Windows® 98/98SE/Me/2000/XP
- An available USB port
- The appropriate network protocols for your LAN (Local Area Network)

NOTE: *The SpeedStream Wireless USB Adapter drivers provided are not installable on Macintosh computers*

Step 1 Hardware Installation

1. **Ensure that your computer is powered on.**

2. **Connect the USB cable to the USB port at the rear of the wireless adapter.**

   NOTE: *This device cannot be connected to the computer using a Bus-powered, USB Hub.*

3. **Plug the other end of the USB cable into an open USB port on your computer.**

4. **Proceed to Step 2: Software installation.**

Step 2 Software Installation

Windows OS Installation Procedure:

1. Insert the SpeedStream Wireless USB Driver CD into the CD-ROM drive.
2. The *"New Hardware Installation Wizard"* will appear. Click **Next** to proceed with driver installation.
3. The wizard will identify a new *"Network Controller"* to be installed and prompt for a driver location. Select **Search for a Driver** and click **Next**.
4. Ensure that the driver CD is in the CD-ROM drive and select your *"CD-ROM drive"* as the search location and click **Next**.
5. When prompted that a driver has been found, click **Next**.
6. Depending upon the version of Windows used, a prompt may appear warning that the *"Siemens SpeedStream Wireless USB" driver does not have a digital signature,* click **Yes** or **Continue Anyway** to proceed.
7. When prompted, click **Finish** to complete the driver installation.
8. After the driver installation is complete, the *SpeedStream Wireless LAN Utility installation* will begin automatically.
9. Follow the simple on-screen instructions to complete the wireless utility installation.

Windows XP Users: The SpeedStream Wireless Configuration Utility functions will be controlled by your operating system after installation is complete. Windows XP provides comprehensive wireless device support for all your wireless devices through the *"Windows XP Zero Wireless Configuration Utility"*. Refer to the User Guide on your SpeedStream CD-ROM for detailed instructions on the functions supported by this utility.

See reverse for additional wireless configuration information for all Windows operating systems.

Step 3 Verify Wireless Configuration

The default wireless parameters on your SpeedStream 1022 wireless product are configured to work with other SpeedStream wireless devices. If you are connecting this product to a wireless device that is not part of the SpeedStream family, all wireless configuration parameters must be configured to match the other devices.

The SpeedStream Wireless LAN Utility icon will be located in the system tray, near the time. Simply **double-click** the wireless icon to open the configuration utility. When installation is complete, the configuration utility can be used to set or change the following wireless communication parameters:

	Default	Notes
SSID	SpeedStream	Must match the SSID of the wireless network
Channel	11	Must match the channel of the wireless network
WEP	Disabled	WEP (Wireless Encryption Protocol) can be Disabled or set to 64 or 128-bit strength

NOTE: *Windows XP users will need to use* ***Windows XP Zero Wireless Configuration Utility****. See users guide on CD-ROM for more detailed instructions.*

LED - Indicator Light Verification

PWR	*Indicates power status.*
LINK	*Indicates link status.*
	Blinking: Indicates that the unit is attempting to establish a wireless connection. Steady (lit): Indicates that a wireless connection has been established.
